1. Business Description

MRT Tech Solutions Ltd is a Rwandan-based IT services company established to support small and medium-sized enterprises in Kigali with secure, scalable, and cost-effective digital solutions. The company focuses on software development, cybersecurity services, IT consulting, and network infrastructure deployment. Rwanda's rapid digital transformation creates strong demand for localized technology providers capable of delivering secure systems tailored to regulatory and operational requirements.

1.1 History and Background

Founded in 2024 by Aime Loic, MRT Tech Solutions Ltd emerged from the recognition that many SMEs in Kigali lack secure digital infrastructure. While multinational firms dominate large-scale government contracts, smaller enterprises often remain underserved. MRT bridges this gap by offering affordable, professional IT services adapted to local market conditions.

1.2 Legal Structure

The company is registered as a Limited Company (Ltd) with the Rwanda Development Board (RDB). This structure provides limited liability protection to shareholders and enables future equity investment opportunities.

1.3 Mission and Vision

Mission: To provide secure, reliable, and innovative IT solutions that empower Rwandan businesses to operate efficiently in a digital economy.

Vision: To become Rwanda's leading indigenous IT services provider by 2030, recognized for technical excellence and security-driven development.

1.4 Competitive Advantage

MRT Tech Solutions differentiates itself through localized regulatory knowledge, competitive pricing, integrated cybersecurity frameworks, and rapid response capability. By embedding security into every development lifecycle phase, the company minimizes client exposure to cyber risks.

2. Marketing Plan

The marketing strategy focuses on SME clients in Kigali requiring digital transformation. Brand positioning emphasizes affordability, reliability, and security-first implementation.

2.1 SWOT Analysis

Strengths: Skilled technical team, cybersecurity integration, local market knowledge.

Weaknesses: Limited brand recognition, startup capital constraints.

Opportunities: Smart Kigali initiatives, fintech growth, increasing SME digital adoption.

Threats: Regional competition, talent migration, rapid technological change.

2.2 5Ps Marketing Mix

Product: Custom software, cybersecurity audits, network infrastructure solutions.

Price: Value-based pricing with flexible SME payment structures.

Place: Kigali-based office targeting urban SME clusters.

Promotion: LinkedIn campaigns, partnerships, tech events.

People: Highly trained engineers with client-centered consulting skills.

3. Operational Plan

MRT operates Monday to Friday from 08:00 to 18:00 and Saturday for emergency support. The company utilizes structured project management methodologies to ensure timely delivery.

3.1 Employee Schedule

The Managing Director oversees strategy. The Project Manager coordinates delivery timelines. Engineers handle development and cybersecurity implementation. Technicians manage hardware and network deployment. Work schedules are structured to optimize productivity and ensure continuous service availability.

3.2 Organizational Structure

The company follows a functional structure with centralized strategic control under the Managing Director and operational delegation to project teams.

4. Financial Plan

The financial structure reflects a service-based accounting model. Revenue is generated through project contracts, cybersecurity subscriptions, and maintenance agreements.

Year 1 Income Statement Summary

Description	Amount (RWF)
Revenue	75,000,000
Direct Service Costs	(15,000,000)
Operating Expenses	(58,400,000)
Net Profit After Tax	1,152,000

Year 1 Balance Sheet Summary

Assets	41,152,000
Equity	41,152,000

3-Year Cash Flow Projection

Year 1 Revenue	75,000,000
Year 2 Revenue	86,250,000
Year 3 Revenue	103,500,000

5. Risk Analysis and Growth Strategy

Key risks include competitive pressure, cybersecurity breaches, and talent retention challenges. MRT mitigates these through strong internal controls, competitive compensation, and continuous skills development programs.

Growth will occur in three phases: consolidation of Kigali SME market share, introduction of subscription-based cybersecurity audits, and regional expansion into East Africa.
